### DETAILED ACTION

1. Applicants' election without traverse of Group I, claims 1-17, filed on Feb. 24, 2005, is acknowledge.

2. This application is in condition for allowance except for the following formal matters:

In claim 1, line 3, after "silicon", insertion of --gate--; in line 8, before "exposed", removal of "the", before "oxide", insertion of --the layer of--; in line 14, substitution of "the exposed oxide" with --unreacted first layer of metal material and thus exposed oxide—are suggested for clarity and/or correctness. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### *Reason for Allowance*

3. Claim 1 recites "removing exposed portions of the layer of oxide material from the first transistor, thereby exposing a top portion of the silicon gate stack...forming a first silicide on the exposed top portion of the silicon gate stack of the first transistor".

These features in combination with the other elements of the claim are neither disclosed nor suggested by the prior art of record.

Claims 2-16 variously depend from claim 1, they are allowed for the same reason.

### *Conclusion*

4. The prior art relevant to the disclosure of this application and not being used in the rejections.

USPN 6828236 to Lee, 6391750 to Chen et al., 6040606 to Blair, and 6762085 to Zheng et al. to for teaching the formation of silicide layers of different thickness on two transistors.
